Sauce for the Goose

It is said, is also sauce for the Gander, but neither Goose nor Gander can prize any sauce half as much as the public admire our

\$10 and \$12 Overcoats.

They catch the eye every time and win the admiration of every beholder. It bespeaks a want of good taste to overlook

The Excellences

OF
These Overcoats.

Their superiority is as evident as a hill in the middle of a plain, and the closer and minute your inspection, the more

Good Points

WILL

Be Discovered.

Description is needless; these Overcoats tell their own story, and tell it so forcibly that you can no more help buying than you can help from smiling at a brand-new joke.

To keep the window plants from freezing at night, put several thicknesses of newspaper between them and the window or set them on the floor, putting the tallest in the centre, and cover with newspapers. Newspapers keep out the cold better than cloths do, and not being so heavy, and being somewhat stiff, will not injure the delicate plants.

Attorney General Ellis has decided that mortgage taxes must be collected where assessed, no matter how soon after the assessment the mortgage may be disposed of. The collector must collect it as he would other personal taxes, by levy, if necessary, on the party, goods and chattels if found anywhere within the county. If not found in the county, the tax would remain as a lien upon the real estate which the mortgage covered.

Business was commenced by the Dairy Association on Monday last. The receipts of milk on that day amounted to about 3,000 pounds from five routes. Milk is now gathered over six routes and amounts to between 4,000 and 5,000 pounds. Three more routes will be started the first of the week. As was stated in a recent issue of the Graphic the creamery is run upon the co-operative plan; the farmer getting for his milk all it can be made to produce under the most favorable circumstances. The Association is making a first-class quality of butter which will command a high price on the market; are confident there is money in it for the farmers and are anxious to be given a trial that they may demonstrate what can be done. They would like to have every farmer within their territory try their new plan of butter making and thus practically demonstrate to their own satisfaction whether or not it is more profitable than the old way, which they will undoubtedly be glad to do.—Armada Graphic.

The F. & P. M. officials desire to say through the columns of the EXPOSITOR that they would consider it a great favor if those persons who bring rice to throw over newly wedded couples, would not scatter it about the waiting rooms of the depot. "No girl under twenty," says a wise woman, "has any business to think of marriage." Bless you, no. We know that. At that age no girl thinks of marriage as a "business." She just falls head over heels in love and marries the dear fellow just because she would cry her eyes out without him. It is when she is no longer what you would just exactly call a "girl," when she is raising thirty-eight and has cut her last new teeth, full set, that she makes a business of it.

Terry.

We are pleased to say that some twenty-eight of our business men have signed an application to be admitted to the Mariette fire department at their next meeting. The fire of last week is having good effect and we hope the revival will be permanent.—Mariette Leader.
